Adapt your company to the new normal

Simplify your IT and accelerate time-to-value with purpose-built systems by Lenovo and VMware that incorporate servers, storage and networking into one flexible and scalable system that's managed as a single entity.

Lenovo and VMware Hyperconverged Solutions

Hyperconverged benefits

Simple deployment

Get it up and running quickly and accelerate time-to-value.

Reliability and scalability

Scale affordably with #1 ranked x86 servers for reliability.

End-to-end Service

Spend less time troubleshooting and more time on growing your business with Lenovo.

Fully certified nodes

Future-proof with fully compliant firmware upgrades.

- ✓ Configuration flexibility to meet any use-case.
- ✓ Reduced operating costs for unlocking cutting-edge innovations.
- ✓ All systems available in all-flash or hybrid configurations.
- ✓ Easy scaling compute or storage capacity.
- ✓ Ability to add capacity to each node or add nodes to scale performance.

- ✓ End-to-end support that includes hardware installation, onsite repair and installation of replacement parts.
- ✓ Fully certified to ensure firmware upgrades don't break compliance.
- ✓ Pre-established support levels that let you meet business needs and response time targets.

As a business solutions provider with a complete portfolio ranging from laptops, tablets and smartphones, Lenovo offers the best solutions for all types of businesses at competitive prices.

VDI Full Package

3 x ThinkAgile VX3320 gen2

(32c 2.1Ghz, 384GB RAM, 2x400GB SSD, 4x1920GB SSD)
Storage capacity 8TB | 250 x VMware Horizon 8 Advanced
VMware vSAN 7 Advanced

User Profile: 2vCPUs/4GB RAM/50GB Disk. Price includes 3-year maintenance NBD. Possibility to adapt configurations for immediate delivery.

from £520
per user
(for 250 users)

HCI Solutions for Data Centers ThinkAgile VX

Has your business suffered from poor flexibility, scalability and automation? Working with siloed legacy infrastructure is both inefficient and makes deploying new technologies more costly and challenging. Lenovo and VMware together can transform your infrastructure model to provide public cloud-like services through their hyperconverged solutions.

✓ **Easy to order.**
Avoid HCL lookups and get only certified firmware with no assembly required.

✓ **Easy to install.**
Enjoy a VX Installer, standardized deployments and guaranteed firmware compatibility.

✓ **Easy to manage.**
Benefit from a single pane of glass management, best recipe firmware and rolling firmware upgrades.

✓ **Complete solution.**
Get certified hardware and firmware that make a perfect building block for private, hybrid and multiclouds.

Hyperconverged bundle

Technology upgrade of traditional environment and storage solution.
